The Aging Brain

Saturday, November 19, 2011

Providence Marriott
Providence, RI

Jointly Sponsored By
Warren Alpert Medical School of Brown University *and*
Department of Neurology at Butler Hospital

Program Description:

Neurological problems are highly prevalent in the elderly, and increase with age, thus increasing the need for early recognition, management and treatment. The goals of this conference are for participants to be better able to diagnose neurological problems in the elderly and distinguish normal from pathological changes of aging, know who to refer for specialty consultations, manage depression in the elderly, and classify the various dementing and behavioral abnormalities common in the elderly. This conference will provide health care providers with understanding and knowledge to be able to improve the care and quality of life of those afflicted with various neurological problems.

Target Audience:

Internists, Neurologists, Psychiatrists, Nurses, Physician Assistants, Social Workers, Pharmacists

Program

7:00 - 8:00 am **Registration and Continental Breakfast**

8:00 - 8:15 **Welcoming Remarks**

Normal Aging

8:15 - 8:45 **Normal Brain Aging - Clinical Changes With Aging**
Stefan Gravenstein, MD, MPH

8:45 - 9:15 **Unscientific Reflections on Aging**
Stanley M. Aronson, MD, MPH

9:15 - 9:45 **“Normal” and Pathological Changes with Age**
John E. Donahue, MD

9:45 - 10:15 **Imaging and Cognitive Testing in Normal and Abnormal Aging**
Paul F. Malloy, PhD

10:15 - 10:30 **Break and Visit Exhibits**

Dementia

10:30 - 11:00 **Clinical and Pathological Syndromes**
Stephen P. Salloway, MD

11:00 - 11:30 **Neuropsychiatric Symptoms in Dementia and Their Treatment**
Michael Friedman, MD

11:30 - 12:00 pm **Driving and Aging: A Review of Neuropsychological Predictors of Impaired Driving**
Melissa M. Amick, PhD

12:00 - 1:00 **Lunch**

Educational Objectives

At the conclusion of this activity, participants should be able to:

1. Recognize the difference between normal and pathological changes in behavior, gait, dexterity, and mood with aging
2. Apply evidence based principle to the management of epilepsy, delirium, depression, and sleep disorders in the elderly
3. Assess which patients require specialty consultations and which do not
4. Examine patients for gait and balance problems
5. Diagnose the more common dementing syndromes and begin treating the cognitive and behavioral components
6. Recognize TIA's and apply evidence based data to reduce stroke risk

Other Neurological Disorders

1:00 - 1:30 **Parkinson's Disease and Other Gait Disorders**
Joseph H. Friedman, MD

1:30 - 2:00 **Ideopathic Normal Pressure Hydrocephalus - Neurosurgical Management of Dementia**
Petra Klinge, MD

2:00 - 2:30 **Seizures and Epilepsy in the Elderly**
Andrew S. Blum, MD, PhD

2:30 - 3:00 **An Evidence-Based Approach to Stroke Prevention: Important Advances in the Last Decade**
Brian Silver, MD

3:00 - 3:30 **Sleep in the Elderly**
Richard P. Millman, MD

3:30 - 3:45 **Break and Visit Exhibits**

Psychiatric Disorders

3:45 - 4:15 **Depression**
Robert Kohn, MD

4:15 - 4:45 **Family Caregiving During Healthy Aging and Illness**
Gary P. Epstein-Lubow MD

4:45 - 5:15 **Delirium in the Elderly**
Jeffrey M. Burock, MD

5:15 pm **Adjourn**

Course Directors
